- *User friendly operation*

 **STANDARD**

PF-P310

The PF-P310 Folder from Standard offers an economical solution for meeting today's folding requirements in any church, school, small in-plant, convenience print shop, reproduction center, or data processing department. Folding up to 190 sheets per minute, the PF-P310 offers six standard fold formats including letter, z-fold, gate fold, half fold, engineering fold, and double parallel folds. You can even produce a cross fold with the optional cross fold guide.

Unique Design

The PF-P310 has two sets of fold plates horizontally positioned under the feed table to reduce machine noise and minimize space. Push button controls, LED indicator lamps, and simple fold-plate adjustment controls allow the operator to quickly and accurately dial in the desired fold. The control panel also features a single sheet test feed button to assist the operator during set-up.

Compact and Simple

The PF-P310 is easy to operate — simply choose from four standard sheet sizes and select one of six common fold formats. Or, set-up manually for special paper sizes and fold patterns.

It's fast. It's economical. It's easy to operate and maintain.

Letter Fold

Half Fold

Double Parallel Fold

Engineering Fold

Z-Fold

Gate Fold

Local Dealer:

Easy set-up and operation

Choose from four preset sheet sizes and six automatic fold formats. Or, set up manually for special paper sizes or fold styles.

Simple Maintenance

You can easily change the feed roller and separator pad. Tool-less removal of the fold rollers makes cleaning or replacement a simple task.
